MESSAGE

Horticulture, which has gained commercial dimensions in the recent years, is an important component of Agriculture; having very significant share in the economy of the country. India has the advantage of diverse agro-climatic conditions which enables it to produce a wide range of horticultural crops round the year. The horticulture crops also provide better alternative for diversification of Indian agriculture in view of higher return. It plays an important role in country's nutritional security as well, including poverty alleviation and employment generation.

Availability of reliable horticulture data is one of the most critical requirements for efficient policy planning to have proper development and management of resources. It helps to suggest ways to ensure availability of sufficient quantities of horticulture commodities in the market at affordable prices. The horticulture database helps not only policymakers but the investors, researchers and members of trading community also.

I am happy to learn that the NHB has now come out with the latest horticulture database in the form of a publication " Indian Horticulture Database 2010" which not only contains information about area, production and productivity of important horticulture crops, but also has data about domestic market price and arrivals, leading exporting countries, international specifications about export of various products, important varieties and fruiting seasons of such crops. This publication will be a valuable reference book for producers, consumers, traders, importers, exporters, extension workers, researchers and others stakeholders.

I am sure that the efforts of National Horticulture Board would go a long way in strengthening the system of horticulture statistics in India in the times to come. I compliment entire team of concerned officers of National Horticulture Board for bringing out the updated horticulture statistics for period ending July, 2010.

FOREWORD

The horticultural scenario of the country has been changing fast, both in terms of production and productivity. India has emerged as a leading horticultural country of the world with a total annual production of 224 million tonnes of horticultural crops during 2009-10. The focused attention and high priority accorded to the development of horticulture in the country has led to increase in production and productivity and opened new vistas for export of fresh and processed horticulture products. India is now the second largest producer of fruits and vegetables in the world and is the leader in several horticultural crops, namely mango, banana, papaya, cashew nut, areca nut, peas and okra.

Availability of reliable horticulture data is one of the most critical requirements for efficient policy planning to have proper development and management of resources. It helps to suggest ways to ensure availability of sufficient quantity of horticulture commodities in the market at affordable prices. The horticulture database helps not only policymakers but the investors, researchers and members of trading community also.

Directorate of Economics & Statistics (DES), Ministry of Agriculture (MoA), Government of India operates a Centrally Sponsored Scheme "Crop Estimation Survey on Fruits and Vegetables (CES-F&V)" for estimating area and production of horticulture crops. However, CES (F&V) covers only 7 fruit crops, 5 vegetable crops and 2 spice crops from 11 States only. In this background, it is appreciated that the National Horticulture Board (NHB) has been taking initiatives to compile and publish annual database for horticulture sector in respect of all the States and the crops and also using secondary sources of data received from the State Directorates of Agriculture / Horticulture, Directorate of Economics and Statistics (DES) of Ministry of Agriculture, Government of India, Commodity Boards, APEDA, FAO etc. After applying validation test, the same is firmed up by the Review Committee in the Department of Agriculture and Cooperation.

I am happy to learn that the NHB has now come out with the latest horticulture database in the form of this publication, "Indian Horticulture database 2010". This contains useful information about area, production and productivity of important horticulture crops and also data about domestic market price & arrivals, exports & other related information for the horticulture. I am sure, this publication will serve as a useful handbook for producers, consumers, traders, importers, exporters, extension workers, researchers and policy makers.

I compliment concerned officers of NHB and Department of Agriculture and Cooperation for their sincere efforts in bringing out this publication. I am sure NHB will do the needful for further strengthening the system of revalidation of data generated by the prevailing methodology in this regard.

PREFACE

National Horticulture Board (NHB) has been regularly publishing important horticulture statistics including annual Horticulture Database, which is a widely used document. It is matter of pleasure for me to bring out Indian Horticulture Database 2010 which covers the horticulture year 2010 i.e. a period from 1st July 2009 to 30th June 2010.

As we all know that the Scheme of Crop Estimation Survey (Fruits & Vegetables), referred to as CES (F&V) is the only system of capturing primary horticulture data regarding area & production but it does not cover all important horticulture crops and producing States. Therefore; the NHB collects and compiles horticulture database for all the major crops for all the States. However, it uses secondary sources of data i.e. the State Directorates of Agriculture / Horticulture; Directorate of Economics and Statistics (DES) of Ministry of Agriculture, Government of India; Commodity Boards; APEDA and FAO etc. A committee headed by the Principal Adviser, Department of Agriculture and Cooperation, Ministry of Agriculture, Government of India analyses the data so complied by NHB and confirms the area & production estimates. It is this approved data which is published in the form of country's annual Horticulture Database.

The present publication of the NHB, "Indian Horticulture Database 2010" contains area and production estimates up to the year 2009-10, apart from the information about price and arrival of important crops in the major markets of the country, export and international data etc. I hope it would be a useful publication for horticulturist community, policy makers, entrepreneurs and other stakeholders.

I convey my special thanks to the State Departments of Horticulture/Agriculture, Directorate of Economic and Statistics (GoI), APEDA, FAO, respective commodity Directorates/Boards, Dr. Gorakh Singh- Commissioner Horticulture, GoI, Ms. Sudha Midha- Advisor (Statistics) DAC and the field offices of NHB for providing useful information for the purpose of compiling this publication.

I also compliment the untiring effort made by Shri Brajendra Singh, Dy. Director; Shri Chander Gandhi, Assistant Director (C) and Shri B.B. Yadav, DEO who constituted the Market Information Cell of the NHB, in completing the task in all.

I take this opportunity to assure you that the NHB will continue to serve the stakeholders by making timely availability of horticulture data in the years to come. NHB welcomes suggestions to improve the content and presentation of the publication.

- Pre-cooling** – Forced air

Storage Conditions :

- | | |
|-------------------|--|
| Holding room | : 13 ⁰ -14 ⁰ C |
| Ripening room | : 14 ⁰ -20 ⁰ C |
| Relative Humidity | : 90-95% |
| Storage period | : Mature-green bananas can be stored for up to 3 weeks in ethylene free air or up to 6 weeks in a controlled atmosphere at 14 ⁰ C |
| Freezing point | : -0.5 ⁰ C |

Treatment for Quality

Ethylene application is best method to hasten ripening without loss in fruit quality or flavour.

A prestorage dip in E-9267 emulsifiable mineral oil at 0.4% was found effective in reducing fruit decay and also prolonged storage life. Dipping of fruits in 1.5% or 2.5% talprolong solution delayed yellow colour development by 4-8 days.

Sensibility to : Refrigeration, Freezing and Ethylene

Growing Belts

The major banana producing belts, are as follows :

- Bihar (Hazipur & Bhagalpur)
- West Bengal (Hoogly, 24 Pargana North & Nadiya).
- Maharashtra (Jalgaon, Ahmednagar, Dhule, Nanded, Parbhani)
- Gujarat (Bharuch, Jhagadiya, Rajpipla, Surat, Narmada, Varodara & Balsad)
- Madhya Pradesh (Bhurapur, Barwani & Dhar).
- Andhra Pradesh (East Godavari, West Godavari, Kurnool, Cuddapah)
- Karnataka (Chamrajnagar, Mysore, Ramnagar, Bangalore Rural, Tumkur, Belgaon, Bagalkot)
- Tamil Nadu (Coimbatore, Erode, Kanyakumari, Karur, Theni, Thiruvannamalai, Thoothukudi, Tiruchirapalli, Vellore and Thanjavur)
- Kerala (Nendrum).

ORANGE (MANDARIN)

Major Producing States - Maharashtra, Madhya Pradesh, Tamil Nadu, Rajasthan, Assam & Tripura.

Latest Production - 20.84 Lakh Tonnes

Main Varieties - In India, specific cultivars of mandarins are cultivated in different regions. For example, Coorg manadarin is typical to Coorg and Wynad regions of Karnataka, whereas Nagpur mandarin is ideally-suited to Vidarbha region. Similarly, Darjeeling mandarin, Khasi and Sumithra mandarins are basically adapted to Darjeeling, Khasi hills and Assam respectively. Of many exotic introductions, Kinnow mandarin has acclimatized very well in semi-arid irrigated zones of Punjab and its adjoining states, and in Nagpur and Akola regions of Maharashtra.

Pre-cooling - Forced air

Storage Conditions

Temperature : 5 - 7°C

Relative Humidity : 85-90%

Storage period : 4-8 weeks

Freezing point : - 3 to -2°C

Sensibility to - Refrigeration and Freezing

Growing Belts

- Maharashtra (Nagpur, Akola, Amravati, Wardha)
- Rajasthan (Jhalawad, Kota)
- Karnataka (Chikmagalor, Kodagu, Hassan)
- Madhya Pradesh (Chhindwada, Mandsaur, Betul, Ujjain, Shajapur)
- Nagaland (Wokha, Tuensang) and Mizoram (Aizawl)
- Tamil Nadu (Dindigul, Salem, Nilgiris) and West Bengal (Darjeeling)
- Assam (Tinsukia, NC Hills, Karbi Anglong)
- Meghalaya (East & West Khasi, Ri-Bhoi, Garo Hills, Jointia Hills)

POST HARVEST MANAGEMENT :

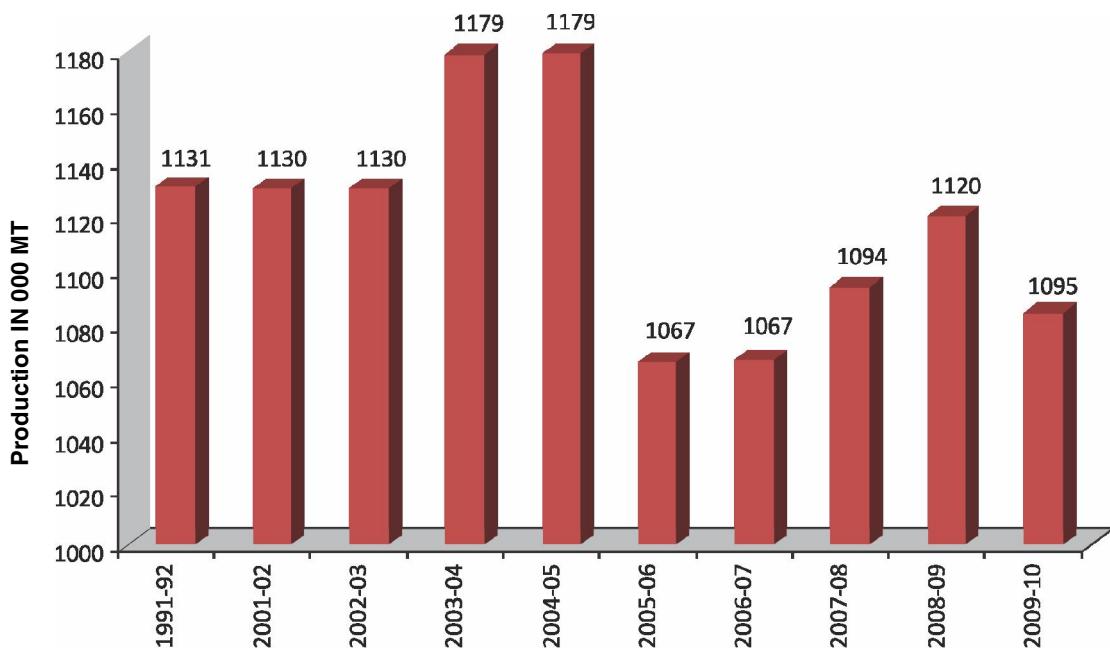

After harvest, tubers are spread in partial shade for 5-6 days, for healing and curing. They should be stored in semi-dark condition in a well-ventilated room. This type of storage invites infestation of pest and diseases. In some parts of the country, tubers are stored in a layer of dry sand/soil after curing under ambient condition. For storing, graded tubers free from sweet potato weevil and bruises should be selected. Farmers store the graded tubers by keeping in a pit shade and covering the pit with paddy straw. Finally, the heap is plastered with mud or cow dung slurry.

Cassava (*Manihot esculenta*), popularly known as Tapioca, produces more calories/unit area.

Major Producing Status : Tamil Nadu, Karnataka and Andhra Pradesh

Main Varieties : Co 1, Co 2, Co 3, H 97, H 165, H 226, KMC 1, M 4, Nidhi, Sree Harsha, Sree Prakash, Sree Sahya, Sree Visakham.

Latest Production : 80.60 Lakh Tonnes

HARVESTING AND POSTHARVEST MANAGEMENT :

The crop is ready 10-11 months after planting. Short-duration varieties can be harvested 6-7 months after planting. Delay in harvesting may result in deterioration in cooking quality of the tubers. High-yielding varieties produce 35-40 tonnes/ha in 10-11 months, whereas short-duration ones (6-7 months) yield 28-30 tonnes/ha.

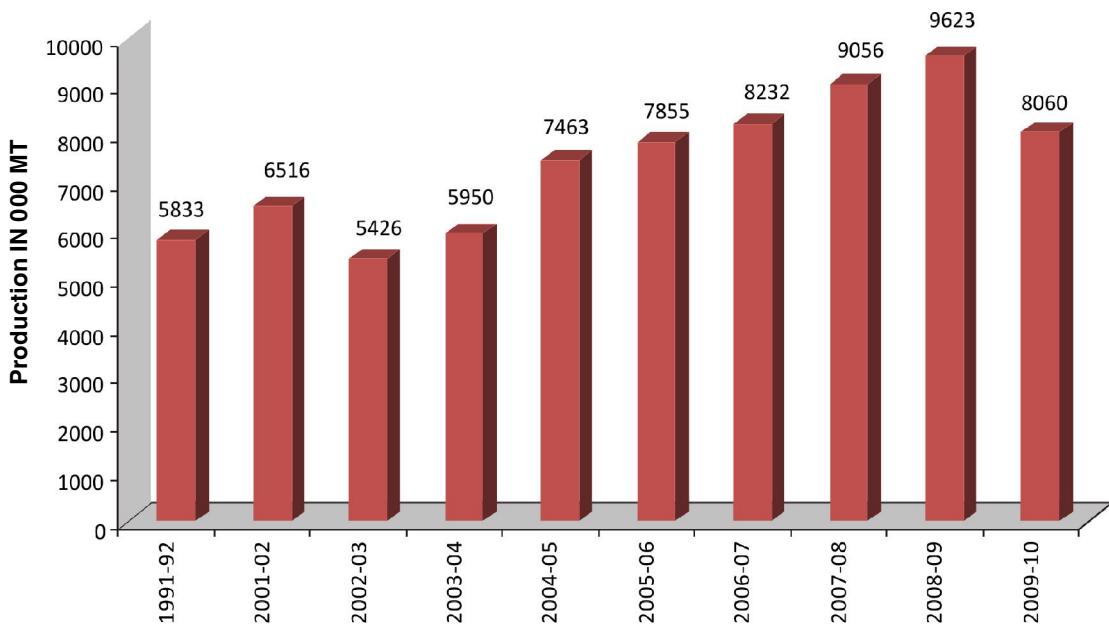

About 70% of the total cassava production is used as food either directly or in processed form. 'Parboiled chips' is a method of processing cassava tuber for storage. These chips are harder than the lain sundried chips due to the partial gelatinization. They can be stored for a longer period than sun dried chips. 'Sago' is an important food product derived from cassava starch.

ARECANUT

Areacanut or betnut or supari is chewed both as raw nut an after processing. Owing to the medicinal properties, it is used in treating leucoderma, cough, fits, worms, anaemia and obesity.

Major Producing States : Kerala, Karnataka, Assam, West Bengal and Tamil Nadu.

Latest Production : 4.78 Lakh Tonnes

Main Varieties

Variety	Recommended for Area
Mangala	Coastal Kerala and Karnataka
Sumangala	Coastal Kerala and Karnataka
Sree Mangala	Karnataka and Kerala
Mohitnagar	Northern parts of West Bengal, coastal Karnataka and Kerala
CAL 7	Andaman and Nicobar Islands
SAS 1	Hilly area of Karnataka

POST HARVEST MANAGEMENT

The most important trade types of arecanuts are dried ripe nuts (chali or kotapak), kalipak and scented supari. To prepare chali or kotpak, ripe nuts are dried under the sun for 35-40 days. These are then dehusked and marketed as whole nuts. A mechanical through-flow drier as well as aa dehusking device have been developed. The well-known grades of chali in decreasing order of sizes are moti, srivardhan, jamnagar and jinni.

Kalipak is processed in Kerala and Karnataka. Iylon, mainly consumed in Tamil Nadu and Andhra Pradesh. Nuli is a variety made from very tender nuts. Scented supari, popular in north and central India, is of chali and kalipak types.

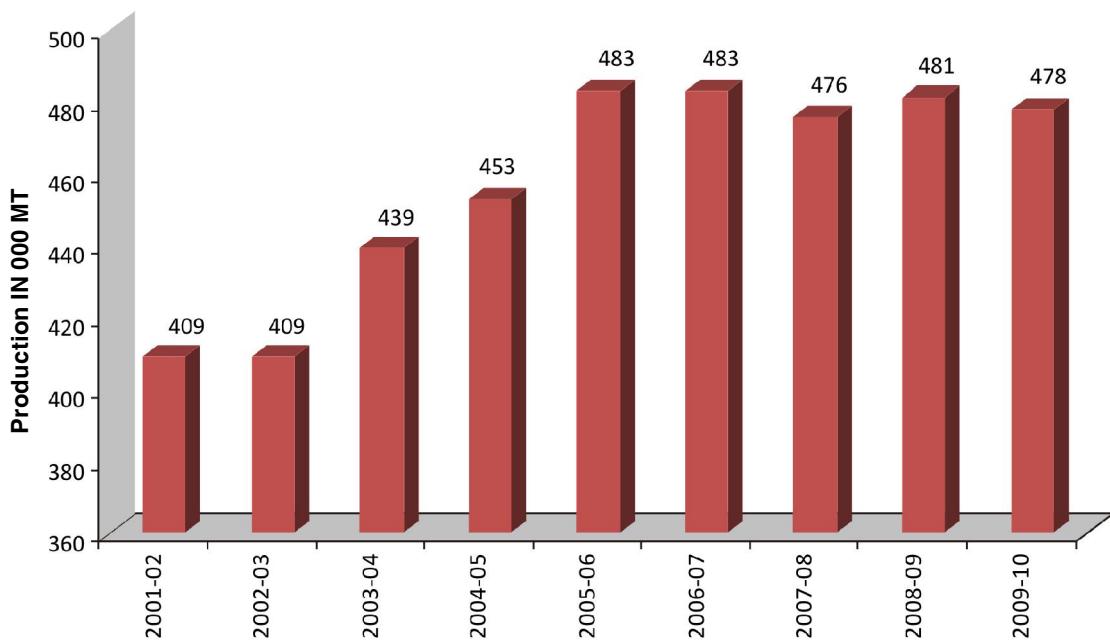

Scented supari, popular in north and central india, is of two types. The first is made from chali and the other from kalipak. Chali and ripe areacanut which leave a large fibrous residue in the mouth are used alongwith betel leaf and slaked lime.

POST HARVEST MANAGEMENT

Cashewnuts are harvested during February-May. Only fully mature nuts should be harvested. Usually, the nuts are picked after they fall off from the trees. Best quality nuts are obtained where freshly fallen fruits are collected. The apples are removed and the nuts are sun-dried for 2-3 days to reduce moisture from 25% to below 9%. With proper drying, the kernels retain their quality, particularly the flavor.

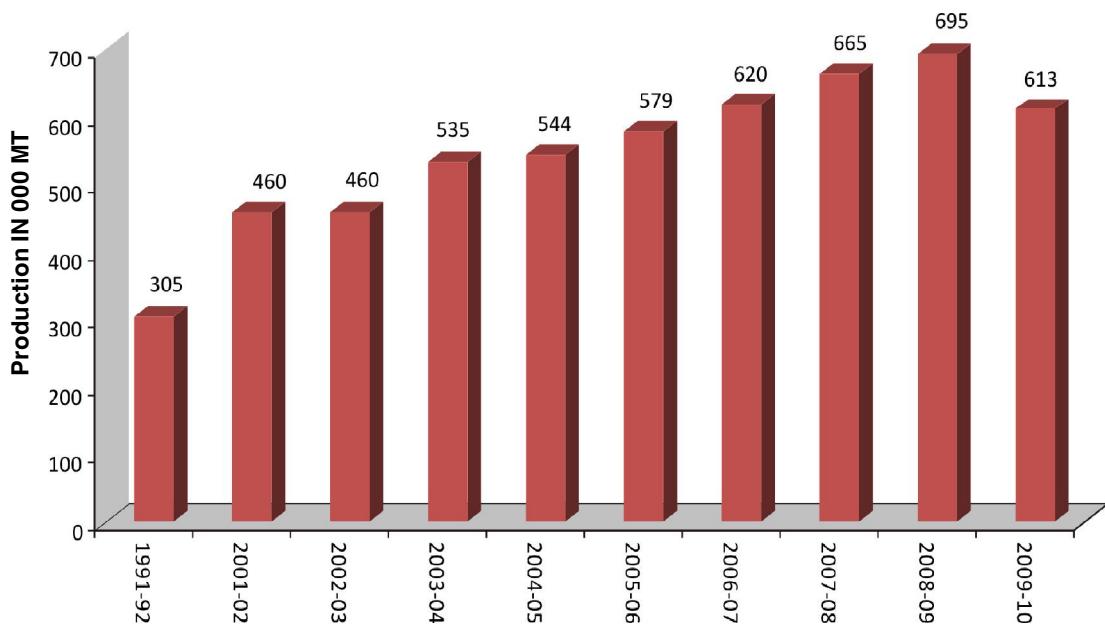

However, if cashew apples are used for processing, it is better to harvest them from the without damaging the apples. The mature nuts sink in water while the immature/unfilled ones float. This test could be used to find out whether the nuts are mature or not. The nuts should be collected at weekly interval in the season. Ripe apples for fresh use should be picked almost daily. The area under trees should be weed-free and swept clean to facilitate nut collection.

Production Trends of Coconut

COCOA

It is an important commercial crop grown the world over. In India, it is being cultivated in Kerala, Karnataka and Tamil Nadu. The current area under cocoa, however, is very small. There is a lot of potential for area expansion as a mixed crop. Kerala accounts for about 76% of the area and 78% of the total production in the country. The remaining area and production is contributed by Karnataka. It is being grown in some pockets in Tamil Nadu and Andhra Pradesh also.

Latest Production : 0.13 Lakh Tonnes

Main Varieties : There are three types of cocoa varieties. They are Criollo, Forastero and Trinitario. Criollo and Forastero are naturally evolved varieties. Criollo types produce best quality cocoa. Forastero types are sturdy. They survive under adverse conditions. Trinitario types have characters of both these types.

POST HARVEST MANAGEMENT :

The harvested pods are broken for extraction of beans by hitting them on a hard surface. The beans are then extracted excluding the placenta. The pods may be kept up to a week before breaking and extracting beans for fermentations. The fermented beans have a moisture content of about 55%. The beans are to be skin dried within 24 hr. after fermentation to avoid mould growth. During drying biochemical oxidation of excess acetic acid from the beans takes place.

Dry cocoa bean can be stored for a long period under suitable conditions. The storage life is decided by the relative humidity and temperature prevailing in the store house. It is found that at 85% relative humidity, the bean moisture contents exceeds 8%. The practice followed at present is to shift the beans to other regions of the country where the conditions are suitable.

NHB SCHEMES AT A GLANCE

National Horticulture Board (NHB) was set up by the Government of India in 1984 as an autonomous society under the Societies Registration Act 1860. Board has its Head Quarter in Institutional Area, Sector 18, Gurgaon (Haryana).

Aims & Objectives of NHB Schemes

The broad aims & objectives of all the above mentioned schemes are as under :-

- Development of hi-tech commercial horticulture in identified belts and make such areas vibrant with horticultural activity, which in turn will act as hubs for development of horticulture
- Development of modern post-harvest management infrastructure as an integral part of area expansion projects or as common facility for cluster of projects
- Development of integrated, energy efficient cold chain infrastructure for fresh horticulture produce,
- Popularization of identified new technologies / tools / techniques for commercialization / adoption, after carrying out technology need assessment
- Assistance in securing availability of quality planting material by promoting setting up of scion and root stock banks / mother plant nurseries and carrying out accreditation / rating of horticulture nurseries and need based imports of planting material.
- Promotion and market development of fresh horticulture produce.
- Setting up of Common Facility Centers in Horticulture Parks and Agri-Export Zones.
- Strengthen market intelligence system by developing, collecting and disseminating horticulture database.
- Carrying out studies and surveys to identify constraints and develop short and long term strategies for systematic development of horticulture and providing technical services including advisory and consultancy services.

1. Development of Commercial Horticulture through Production and Post Harvest Management of Horticulture Crops

Description of components and Pattern of Assistance

- Production related components:- Credit linked projects relating to establishment of hi-tech commercial production units involving any of the following items are eligible for assistance under this component :-
 - High quality commercial horticulture crops
 - Indigenous crops / produce, herbs, spices
 - Aromatic & Medicinal Plants
 - Seed & Nursery

- Bio-Technology, micro-biology, bio-chemistry, bio-diversity & tissue culture
- Protected cultivators
- Bio-pesticides
- Organic fertilizers, organic foods, bio-dynamic farming, vermi-compost
- Establishment of Hort. Health clinics / laboratories
- Hydroponics, Aeroponics
- Beekeeping and its products
- Mushrooms and its products
- Nuts and its products

- **Pattern of Assistance**

Credit linked back-ended subsidy @ 20% of the total project cost limited to Rs 25 lakh per project in general area and Rs 30.00 lakh in NE Region, Hilly and Scheduled areas. However, for capital intensive and high value crops under protected cultivation and open air cultivation of date palm, olive and saffron subsidy will be @ 25% of project cost with ceiling of Rs.50 lakh (33% of project cost with ceiling of Rs.60 lakh for scheduled and hilly areas).

- **General conditions**

- The above assistance shall be available for projects covering area above four hectares (above 10 acres) in case of open cultivation, and more than 1000 sq. meter in case of protected cultivation.
- Credit component as means of finance of the project should be term loan from banking or non banking financial institutions and should be at least 15 % more than the admissible rate of subsidy.
- Projects relating to setting up of new production units shall be appraised to ensure and enable entrepreneur to incorporate essential hi-tech components in the form of planting material, plantation, irrigation, fertigation, precision farming, on farm PHM/ primary processing related infrastructure, GAP etc.; and to that extent, the project shall be integrated in nature.
- Normative cost of various components shall be prescribed by NHB.

PHM/Primary Processing related components: - credit linked projects involving the following items are eligible for assistance under this component :-

- Washing, drying, sorting, grading, waxing, packing, palletizing, freezing units etc.
- Pre-cooling units / Cool Stores
- Reefer Van / Containers
- Specialized Transport Vehicle
- Retail outlets
- Auction platform

- Ripening / curing chamber
- Market yards / rope ways
- Irradiation / Vapour Heat Treatment unit
- Primary processing of products (fermentation, extraction, distillation, juice vending, pulping, dressing, cutting, chopping, dehydration etc.)
- Natural colour and dyes extraction
- Essential oils, perfumery and cosmetics out of horticulture products
- Products out of horticulture waste
- Horticulture ancillary industry for promoting indigenous manufacturing of horticulture related farm tools & machineries, equipments, plastics containers, packaging etc.
- Adoption of Quality Assurance Systems (HACCP, TQM, ISO, Euro-GAP etc.)
- Plastic Crates and Bins, Cartons, Aseptic Packaging and Nets

- **Pattern of Assistance**

Credit linked back-ended subsidy @ 40% of the total project cost limited to Rs 50 lakh per project in general area and @ 55% of project cost limited to Rs 60.00 lakh in Hilly and Scheduled areas. Pattern of assistance for plastic crates will be 50% of the total cost.

- General conditions for PHM/PP projects are given in detailed guidelines.

2. Capital Investment Subsidy Scheme for construction/ expansion/ modernization of Cold Storages/Storages of Horticulture Produce

Description of components and Pattern of Assistance

- **Components:-** Credit linked projects relating to Cold Storages including Controlled Atmosphere (CA) and Modified Atmosphere (MA) Stores, pre-cooling units, other Storages for onion, etc., their modernization are eligible for assistance under this component.

- **Pattern of Assistance:** - The assistance will be as credit linked back-ended subsidy @ 40% of the capital cost of project in general areas and 55% in case of Hilly & Scheduled Areas for a maximum storage capacity of 5000 MT per project for item (i) to (iv) below: -

- **General conditions for cold storage projects**

- Multi-chamber cold storages with mezzanine floors of RCC and or wooden structure for products not requiring pre-cooling, temperature range 0°C plus to 16°C or above with fin-coil cooling system, with control system for humidity (RH 80% to 95% in general and 65%-70% for onion & garlic or appropriate level for seed storage etc) and appropriate handling of stored commodity with safety system against accidents of fire, leakage of refrigerant etc. Minimum of two chambers, Standard insulation material, with civil structure, insulations and cooling system as per prescribed Standards - @ Rs 6,000 per MT
- Multi-chamber and Multi-Product cold storage for whole range of horticulture produce but without pre-cooling system (temperature range from -2°C or lower to +16°C plus

(with temperature, humidity and CO₂ control (RH= 80% to 95% for F & V in general and 65%-70% for onion & garlic or appropriate level for seed storage etc), fin-coil cooling system and energy saving devices for peak and lean load period, heat exchanger with CO₂ control system, appropriate technology for control of microorganism / dust mite and mechanical handling of stored commodity such as racks, pallets & forklift / stacker (as per site conditions); bags/ bins and crates/ CFB boxes and also safety devices against accident.

- (a) With civil structure/ pre-fabricated engg. Structure, insulation, cooling system etc as per prescribed standards excluding cold storage with mezzanine floors @ Rs 7000/- per MT
- (b) With civil structure/ pre-fabricated engg. structure, insulation, cooling system etc. as per prescribed standards (excluding cold storage with mezzanine floors) and having on-farm or off-farm pack house facility of washing/ de-sapping (as per requirement), drying, sorting, grading, waxing, packing etc and pre-cooling @ Rs 8000/- per MT.

- **Modernization of Cold Storages**

- (a) Up gradation of thermal insulation
- (b) Up gradation of cooling system, refrigeration, air flow, electric installation, handling devices, safety devices etc.

Project based @ maximum 1000/MT for (i) and up to Rs. 2000/MT for (ii) above

Benefit of (i) and (ii) above may go together for complete modernization.

- CA Storages (@ Rs 32,000 per MT)
- Credit components as means of finance of the project should be term loan from banking or non banking financial institutions and should be at least 15% more than the admissible rate of subsidy.
- Only such projects under this component shall be eligible to get financial assistance as per revised norms, which meet prescribed minimum technical standards; this shall be ascertained as per implementation protocols prescribed in this regard.
- Rack, pallets and design-appropriate system for mechanized handling are incorporated in above type designs.
- In respect of projects, which have addition of components or technically recommended different combinations of components of pre-cooling, pack house etc, the normative cost shall be worked out by the Committee of the Board.
- NHB assistance is available only when notified latest technical standards and protocol for the purpose by the Ministry of Agriculture are followed by the beneficiary.

3. Technology Development and Transfer for promotion of Horticulture Components

- Introduction of New Technology
- Visit of progressive farmers
- Promotional and Extension Activities

- Technical knowhow from India/Abroad
 - Technology Awareness
 - Organising/participation in seminars/symposia/exhibitions
 - Udyan Pandit
 - Publicity and Films
 - Awareness for technology up gradation and markets
 - Honorarium to scientists for effective transfer of technology.
 - Accreditation and Rating of Horticulture Nurseries
 - Mother Plant Nurseries for pedigree planting material for fruit crops
 - Assistance for Common Facilities in Horticulture Parks/ Agri. Export Zones etc.
- For Componentwise implementation and pattern of assistance, please refer detailed guidelines.

4. Market Information Service for Horticulture Crops Objectives

- To generate information on wholesale prices, arrivals and trends in various markets of the country for important fruits, vegetables & flowers etc and also on retail prices for increased number of selected markets

- To analyze the trends of arrivals, prices and other related factors of the selected fruit and vegetables such as stock in storage, crop stand etc and generate Market Intelligence Reports
- To establish a nation-wide communication network for speedy collection and dissemination of market information data for its efficient and timely utilization.
- To prepare farmers' advisory and issue the same for the benefit of producer farmers especially by making use of statistics so generated and collected for optimizing returns to the producers
- To collect and disseminate information on international prices prevailing in potential foreign markets
- To collect and compile horticulture database and strengthen existing system of 'Crop Estimation Survey-Fruits & Vegetables' (CES-F&V) as far as possible

5. Horticulture Promotion Service

Under this component, specialized studies and surveys shall be carried and study / survey reports shall be brought out for use by targeted beneficiaries. In addition, technical laboratories shall be set up or cause to be set up and also provide technical services including advisory and consultancy services. This shall be done by NHB with or without services of outsourced experts.

Components

- Review the present situation of horticulture development in particular area/ State
- Identify constraints in horticulture development and suggest remedial measures
- Develop short term and long term strategies for systematic development of horticulture,
- Develop primary/secondary data of various aspects on horticulture,
- Provide consultancy services, expert services & establishing labs etc. in pursuance thereof,
- Conduct technical scrutiny and certification of cold chain infrastructure as per implementation protocol for Technical Standards for cold storages etc.
- Preparing reports relating to export competitiveness in the area of fresh horticulture produce,
- Any other component of expert services provided by NHB addressing to identified needs of the sector

Eligible Organizations

Unless otherwise specified, organizations/promoters, such as NGOs, Association of Growers, Individuals, Partnership/Proprietary Firms, Companies, Corporations, Cooperatives, Agricultural Produce Marketing Committees, Marketing Boards/ Committees, Municipal Corporations/ Committees, Agro-Industries Corporations, SAU's and other concerned R&D organizations are eligible to get assistance under all the NHB schemes.
