#### **EXPERIENTIAL LEARNING**

#### 1. Concept

The concept of EL is not really new. It was there in our culture much before the formal education existing today. During the Gurukul Era, the Shishyas (Students) learned the education by actively indulging in various activities under the supervision of the Guru (Maestro) and not just memorizing it for passing in the examinations. Experiential education is a philosophy and methodology in which educators purposefully engage with learners in direct experience and focused reflection in order to increase knowledge, develop skills and clarify values.

Although, the present education system in Agricultural Universities focuses on hands on experience, their s.kill and knowledge capabilities do not fill the requirements of the growing private sector. They are unable to become true professionals who can analyze the real life situation and manage field problems by providing appropriate solutions and become confident in taking up self-employment. This demands to build practical skills and entrepreneur spirit among the students besides preparing them with analytical concepts.

The word 'experiential' essentially means that learning and development are achieved through personally determined experience and involvement, rather than on received teaching or training, typically in group, by observation, listening, study of theory or hypothesis, or some other transfer of skills or knowledge. Experiential learning is a business curriculum related endeavor which is interactive (other than between teacher and pupil).

EL is for building (or reinforcing) skills in leadership and decision-making, individual and team coordination, approach to problem solving and resolving conflicts, etc. The degree of difficulty in this situation is very high and individuals and teams are encouraged to set and achieve stretch goals. Carefully calibrated activities move participants to explore and discover their own potential. Both activities and facilitation play a critical role in enhancing team performance back at the workplace.

#### 2. Objectives

EL provides the students an excellent opportunity to observe, think, analyse, synthesize, evaluate and apply the acquired knowledge. It promotes entrepreneurial skills and knowledge through meaningful hands on experience

#### 3. Organizational set up of the EL Unit:

To give the real experience of an Enterprise to the student, each EL unit maintains an organizational set up as follows:

The above organigram depicts the hierarchy of the enterprise. Advisors from the private sectors can also be engaged for consultation for the programme, production and sales profitability. The Head of the department where EL unit is proposed should identify suitable faculty member with commitment as Manager of the EL programme. Another faculty member should also be identified to assist the manager during the period of absence due to unavoidable circumstances.

#### 4. Registration and Orientation

The students will register for 20 credits (0+20) in a semester. The duration/weightage for different activities during the year will be as under:

| Activity                                  | Credit hours | Durations |  |
|---|--------------|-----------|--|
| Orientation                               | -            | 2 weeks   |  |
| Experiential Learning                     | 0+20         | 26 weeks  |  |
| Rural Agricultural Work Experience (RAWE) | 0+10         | 6 weeks   |  |
| Industrial training or Inplant Training   | 0+10         | 18 weeks  |  |

#### i) Orientation:

The students will be introduced to the concept of above programme and its components to be achieved through experiential learning.

#### ii) Experiential Learning:

Under this programme, the students will undergo hands on training based on the concept of "earn while you learn" adopting an end to end approach (production to marketing).

The students will choose one programme out of the following three programmes (Modules):

- 1. Commercial Horticulture
- 2. Protected cultivation of high value Horticultural crops
- 3. Processing of fruits and vegetables for value addition.

#### iii) Rural Agricultural Work Experience (RAWE):

Under RAWE, students will be required to stay in the villages along with the farmers to have a deeper insight in to the rural life and will study the village profile i.e. Literacy, nutritional habits, socio-economic status, status and potential of Horticulture, Technological gaps, various developmental schemes run by the government and NGOs working in that area etc. The students will maintain the daily work sheet to be evaluated weekly by evaluation committee in consultation with the local bodies.

#### iv) Industrial Attachment/inplant training:

The students will be attached with the related industry (ies) where they will work under the real life situations. This will give them opportunity to critically examine the weaknesses and gaps in their chosen programmes. The progress of the students will be monitored and evaluated jointly by the representatives of the concerned industry and the committee constituted for this purposed by the University in the weightage of 75:25.

Note: The plan and sequence of the Experiential Learning Programme, RAWE and industrial attachment will be finalized by the various Colleges/Institutions as per the production plan/agro-climatic conditions prevailing in their regions.

#### v) Coordination/Monitoring/Evaluation Committee:

For this programme, a senior level Professor (Managing Director) will be nominated as a Coordinator along with two experts/specialists (Managers) from each of the experiential learning modules to execute the programme. They will monitor and evaluate the activity and progress of the students.

#### 5. Attendance

The minimum attendance required for this programme is 85%. The attendance of a student will be maintained at the EL unit. The attendance particulars shall be communicated to the Chief Executive Officer (Associate Dean) by the Manager of the EL unit every week. The students will be eligible for the final evaluation of EL only when the attendance requirement is met with. Any student in the event of recording shortage of attendance, has to re-register the EL when offered next by paying the assigned fee.

#### 6. Eligibility

The students will not be allowed to club any creditable course along with ELP. However, they will be allowed to clear the back log after the completion of ELP.

#### 7. Discipline

Students are expected to adhere to the activities of the enterprise strictly during the programme duration. If the activities are prejudicial to the EL programme, the student shall be withdrawn from the programme and subjected to disciplinary action as per the University norms.

#### 8. Student Advisory Committee

An Advisory committee will be constituted for EL programme with the EL Manager of the unit and the general advisor allotted to the student at the time of admission. The student shall meet the advisor once in a week and review the progress of ELP.

#### Manager:

- Orientation of the EL activities of their discipline to the students
- Record the attendance of the students and ensure the participation of the student for 8 hours per day
- Identify the resource persons in the relevant field and arrange for guest lectures
- Identify and arrange for student's training in entrepreneurial advanced skills after approval from CEO
- Group the students as per their skill and interest in carrying out the enterprise activities
- Assist students in developing business plan/ project proposals
- Offer suggestions in all EL activities
- Plan for survey and accompany students for receiving effective market information
- Conduct the primary assessment of the business plan and give report to the MD
- Steer the students in construction of production plan
- Guide the students in production
- Guide the students for quality analysis
- Lead the students for marketing and sale of products
- Monitor all enterprise activities daily for 8 hours
- Fix the responsibility of enterprise activities to the students & rotate the responsibilities
- Guide the students for record keeping and enterprise economics
- Inform MD and CEO about the progress of EL unit
- Propose the examination schedule

#### 9. Devolution of powers:

CEO:

- Overall responsibility for successful functioning of all EL units under the college
- Recommend / withdraw the EL unit based on the profit / loss status of the unit in coordination with EL MD and Manager
- Sanction power upto Rs 1,00,000/

#### MD:

- Responsible for over all progress of the El unit
- Recommend to the CEO for closure of the unit if the status of the El unit is not satisfactory in terms of profit and quality of the end product
- Sanction power up to Rs 50,100/-

#### Manager:

- Responsible for day to day activities of the EL unit
- Report to the MD about the functioning of the El unit
- Sanction power up to Rs 25,000/

Above Rs 1,00,000 permission required from Dean of faculty

#### 10. Programme of Work:

The EL programme will continue for 180 days without any break. The schedule of the work is as follows:

| S.No. | EL Activity                      | No. of Days                       |
|-------|----------------------------------|-----------------------------------|
| 1.    | Orientation/ project development | 02 weeks                          |
| 2.    | Production and marketing         | 22 weeks                          |
| 3.    | Documentation and report writing | 01 week                           |
| 4.    | Evaluation/Oral Examination      | 01 week                           |
| 5.    | Total                            | 26 weeks (restricted to 180 days) |

#### 11. Programme Monitoring:

The programme will be continuously monitored by the Manager and MD (Head of the Department). The CEO (Associate Dean) will receive the information about the EL unit regularly and monitor physically once in a week. The sales part of all the units in the college will also be continuously monitored by the CEO. The sales of all EL products will be arranged in the most prominent place in the college to attract the customers. The Dean will monitor the EL programme once in a month and offer suggestions.

#### 12. Faculty responsibilities:

CEO (Dean/Associate Dean):

- Arrange for registration and general orientation of the EL programme
- Motivate students for effective participation
- Approve the arrangements made for training students in advanced skills
- Assess the feasibility of the business plans developed in all units in coordination with experts in the field
- Monitor the enterprise activities of each unit on weekly basis Render help in solving administrative problems of the unit
- Convene regular meetings with MDs of all EL units and advisors of the students In the college to ensure the profitability of the EL unit
- Approve the schedule of the examination

MD

- Orientation of the EL activities of their discipline to the students
- Identify resource persons in the relevant field along with the Manager
- Scrutiny of business plan/ project proposals and submission to CEO
- Offer suggestions in all EL activities
- Monitor EL programme of their unit twice a week
- Issue letters of correspondence for interaction with other enterprises/ institutes
- Conduct of examination and evaluation
- Scrutiny of EL unit records

## MODULE 1

(COMMERCIAL HORTICULTURE)

#### Module -1: Commercial Horticulture

| Sr.No. | Activity  | Credit hours |
|--------|---|--------------|
| a.     | Nursery production of fruit crops               | (0+7)        |
| b.     | Nursery production of ornamentals               | (0+7)        |
| c.     | Protected cultivation of vegetables and flowers | (0+6)        |

#### 1. Objectives

- To develop skill in producing quality planting material of fruit crops
- To acquire skill in nursery production of commercially important ornamentals
- Multiplication of ornamental plants to cater the need of landscape industry
- To acquire skills in various activities of the protected cultivation of high value vegetables and flowers
- To develop enterprise management capability

#### 2. Justification:

Horticulture has become a key driver for economic development in many states of the country but one of the constraints is availability of planting material, poor yields and low productivity, wider year to year fluctuations and poor quality of produce. The use of low grade and poor quality planting materials is one of the major causes for low productivity. This warrants proper planning to increase production and productivity for which trained skilled human resources in horticulture are the need of the hour. Through experiential learning on commercial horticulture, the students will produce quality planting material of fruits, ornamentals and vegetable crops. Besides this, they will also develop the managerial skills of entrepreneurship.

#### 3. Activity components :

- a. Survey and risk assessment
- b. Sourcing for inputs
- c. Saleable plant materials
- d. Production plan
- e. Production and quality control
- f. Packaging & marketing
- g. Financial accounting
- h. Profits

#### 4. Project development

- a) Demand assessment
  - To be obtained from the concerned state Horticulture/ Agriculture departments, marketing need assessment.
- b) Sourcing of inputs
  - All the inputs like rootstocks, seeds, fertilizers, pesticides, planting materials portrays, pots/containers, media, growth regulators and garden tools etc.
- c) Type of products
  - Potted and bag plants, grafted, budded and own rooted fruit plants, vegetable and flower seedlings, vegetables and flowers produce.
- d) Production plan

e)

• Decision on season, quantity to be produced, varieties to be grown, market channels Orientation about funding agencies

NABARD and other banks

- f) Production per se
  - Preparation of activity chart/ Bar chart for production schedule
- g) Packaging and marketing
- h) Financial accounting (Calculation of net profit on the end- to-end basis)

#### 5. Distribution of credits activity wise

| S.No. | Activity  | Components  | Credit<br>Hrs |
|-------|---|---|---------------|
| 1.    | Nursery Production of fruit crops               | <ul> <li>Raising of rootstocks</li> <li>Grafting &amp; Budding of rootstock</li> <li>Management of grafted plants</li> <li>Plant certification, packaging &amp; marketing, quality control</li> </ul> | 07            |
| 2.    | Nursery production of ornamentals               | <ul> <li>Production of plantlets</li> <li>Production of potted plants</li> <li>Management &amp; Maintenance</li> <li>Sale &amp; marketing</li> </ul>  | 07            |
| 3.    | Protected cultivation of vegetables and flowers | <ul> <li>Nursery raising/procurement &amp; transplanting</li> <li>Management &amp; maintenance of the crop</li> <li>Postharvest handling, quality control &amp; marketing</li> </ul>                  | 06            |

- 6. Duration1. Orientation/ project development2. Production and marketing3. Documentation and report writing4. Evaluation/Oral Examination01 week
  - Total

#### 7. Faculty responsibilities :

• Orientation – introduction, objectives

- Procurement of inputs
- Monitoring, assessment and evaluation
- Arranging for guest faculty
- Supervision of production, marketing

8. Production Plan – An illustrative example for hill horticulture (Others colleges may develop their own plan suited to their regional situations).

| Duration 1 <sup>st</sup> week 2 <sup>nd</sup> week 3 <sup>rd</sup> week 4 <sup>th</sup> week                            |                             |

|       | Net Profit                       |                       |           |                    | 21,45,000                  |  |
|       | Net Profit per student per month |                       |           |                    |                            |  |

\*The production during the period of 6 months has been computed. The production cost included only recurring contingencies plus minor tools/equipments

#### 12. Marketing strategy/Plan including product sale

#### Marketing:

- Develop the market strategy (packaging, transportation and sale)
- Liaisoning with the state agriculture/horticulture departments/ farmers/ landscape developers, hotel industry etc.

#### 13. Risk assessment:

- Market gluts, weather vagaries, natural calamities
- Fluctuation in demand

|     | -     | •      |

|       | Total  | 32,25,000            | 10,80,000           | 21,45,000                                     | 26,813  | 89,375  |

**Note:** Net profit worked out for 10 students and profit share per month is worked out on the basis of net income from 6 months.

## MODULE-2

#### (PROTECTED CULTIVATION OF HIGH VALUE HORTICULTURE CROPS)

#### Module-2: Protected cultivation of high value horticulture crops.

#### 1. Location with address: College of Horticulture/Departments.

#### 2. Objectives

- To develop skill in protected cultivation of high value horticulture crops like production of healthy planting material, cultivation of flowers and quality vegetable production
- Understanding various greenhouse structures, their construction and design as per the agro climate of the area.
- To acquire enterprise management capability.
- To develop skill about crop production methods of these specified crops.

#### 3. Justification of skill learning and employability

The protected cultivation is a common practice in advanced countries to produce vegetable and other horticultural crops with more productivity and higher levels of quality that fetches high returns to the growers. It also provides an opportunity for efficient resource management of various inputs required in crop production hence making it more profitable. Even areas which are unfit for conventional cultivation can be brought into cultivation because of the use of artificial growing conditions and media.

The students will also have the opportunity to understand the construction of the greenhouses on scientific lines and further raising of the different crops with right selection of varieties and their management. After developing the skills the student will have ample experience to start there own entrepreneurship in this area.

#### 4. Activity components

The modules will be dealt under the following three sub-modules.

- i. Raising quality planting material on commercial scale.
- j. Cultivation of commercial flowers.
- k. Production of high value vegetables/fruits.

The major activity components will be as follows:

- a. Assessment of market demand for crop selection.
- b. Procurement of quality planting material and other inputs.
- c. Types of products to be procured
- d. Design selection and construction of greenhouse (Pre-activity)
- e. Development of production plans
- f. Packaging and marketing
- g. Financial Accounting

#### 5. Project development

j) Demand assessment

The crops will be selected for growing inside the greenhouses as per their demand in the major whole sale and retail markets in the nearby region. The opportunities of the buyback arrangement will also be explored.

### k) Procurement of inputs All inputs required in crop production like seeds, fertilizers and growing media etc will be procured from the open market.

- 1) Types of inputs to be procured activity-wise
  - Raising of quality planting material (Growing media, protrays, growth regulators, seeds etc)
  - Production of flowers (Planting material, other inputs).
  - Production of vegetables/fruits (Seeds, seedlings and other inputs)
- m) Development of production plans: Preparation of bar charts for production schedule.
- n) Packaging and marketing
- o) Financial accounting (calculation of net profit on end to end basis)

#### 6. Distribution of credits activity wise

The 20 credits of the module will be distributed in the following manner for each activity.

| •    | Raising quality planting material on commercial scale. | 6 Credits  |
|------|--|------------|
| •    | Cultivation of commercial flowers and foliage plants.  | 7 Credits  |
|      | Production of high value vegetables/fruits.            | 7 Credits  |
|      | Total  | 20 Credits |
|      |  |            |
| tion | · ·  |            |

#### 7. Duration

| Total   | 24 weeks  |
|---|-----------|
| <ul> <li>Oral examination and evaluation</li> </ul>         | -1 week   |
| <ul> <li>project report writing and presentation</li> </ul> | -1 weeks  |
| <ul> <li>Production and marketing</li> </ul>                | -20 weeks |
| <ul> <li>Orientation and project development</li> </ul>     | -2 weeks  |

#### 8. Faculty responsibilities :

- Orientation introduction, objectives and related counseling.
- Procurement of inputs
- Providing necessary tips for cultivation and crop selection
- Mentoring, assessment and evaluation

- Supervision of project proposal
- Arranging for guest faculty
- Supervision of production, marketing

#### 9. Production Plan

#### Number of greenhouses

#### : 3 Cost –effective (500m<sup>2</sup>)

: 1 Fan and Pad cooled (500m<sup>2</sup>)

(3.0 Lac/GH) (5.0 lacs/GH)

| S.No | Activity  | Material generated (Time frame 5 months)  |
|------|---|---|
| 1.   | Raising quality planting<br>material on commercial<br>scale (based on demand) | <ul> <li>-2 lacs cuttings of carnation in 500 m<sup>2</sup> greenhouse in six months</li> <li>-2 lakh seedlings of capsicum/ Tomato in protrays and a commercial crop of Cucumber in 500 m<sup>2</sup> greenhouse (The crop and time for planting material need to be selected as per the demand in the region). +</li> </ul> |
|      |   | -Cucumber crop from Aug to December (50q)+<br>- A tomato crop from Feb. to July (40q).  |
|      |   |   |
| 2.   | Cultivation of commercial flowers.  | -40,000 cut flowers from 500m <sup>2</sup> greenhouse   |
| 3.   | Production of high value vegetables/fruits                                    | <ul> <li>40 quintals of capsicum fruits (FebJuly)</li> <li>+ 50 q of Tomato (Aug-Jan.) from 500m<sup>2</sup> GH</li> </ul>  |

Note: Examples are illustrative only. Crops may be chosen based on the feasibility in the area.

#### 10. Infrastructure (i) Civil, (ii) equipment/machinery, (iii) any other

#### (i) Civil work

| Civil work | Establishment of fan and pad system | Rs.5.0 lakh    |
|------------|-------------------------------------|----------------|
|            | greenhouse (based upon demand)      |                |
|            | 3 Cost-effective greenhouses        | Rs.9.0 lakh    |
|            | Mist Chamber (80sqm)                | Rs.8.0 lakh    |
|            | Total                               | Rs. 22.0 lakhs |

#### (ii) List of equipment/ machinery required

| Machinery type |  | No | Amount (Rs in |
|----------------|--|----|---------------|
|                |  |    | Lakhs)        |

| Power tiller (one in all ELU,s)                        | 1 | 1.5 |
|--|---|-----|
| Need based equipments like climate and soil monitoring |   | 3.0 |
| system   |   |     |
| Total  |   | 4.5 |

#### (iii) Other infrastructure facilities required with cost

| S.No  | Item                                    | Number | Amount (Rs. in lakhs) |
|-------|---|--------|-----------------------|
| 1     | Cold storage facility (1000 cubic feet) | 1 No.  | 5.00                  |
| 2     | Grading and packaging hall              | 1 No.  | 2.00                  |
| Total |   | ••     | 7.00                  |

Rs 3 lakhs

#### 11. Recurring Contingency required (for various inputs)

12. Total Budget required

| Civil works                              | ₽a   | 22 A Lathe  |
|--|------|-------------|
|  | 1.5. | 22.0 Lakits |
| Equipments                               | Rs   | 4.5 lakhs   |
| Other Infrastructure required            | Rs   | 7.0 lakhs   |
| Revolving fund (Recurring contingencies) | Rs   | 4.0 lakhs   |
| Total                                    | Rs   | 37.5 lakhs  |

#### 13. Production (Activity-wise)

#### A. Production and Economics :

The production during the period of 6 months period will be as follows

| S.No | Activity                       |                             | Production<br>Cost          | Quantity           | Total<br>Returns | Total<br>Profit |
|------|--------------------------------|-----------------------------|-----------------------------|--------------------|------------------|-----------------|
| 1.   | Raising<br>quality<br>planting | Floriculture<br>(Carnation) | Rs 2,60,000<br>(year round) | 4 lakh<br>cuttings | 24.0 L           | 21.40 L         |

|    | material on<br>commercial<br>scale. | iterial on<br>mmercial Vegetable<br>ile. seedlings |                         | 2 lakh<br>seedlings   | 2.0 L  | 1.0L   |
|----|-------------------------------------|--|-------------------------|-----------------------|--------|--------|
|    | Cucumber<br>production<br>(Aug-Dec) |  | Rs. 30,000.0            | 50.0 q<br>(20/ kg)    | 1.0 L  | 0.7L   |
| •  |                                     | Tomato Crop<br>(Jan-July)                          | Rs. 20,000.0            | 40.0q<br>(20/kg)      | 0.80 L | 0.6L   |

|    | Tomato/Cucumber<br>(Aug-Dec)        |  | Rs. 25,000.0            | 50q<br>(20/kg)        | 1.0L   | 0.75L  |
|    | Total                               |  | Rs.<br>5,45,000.0       |                       | 32.40L | 26.95L |

Total Cost Labour Cost (10% of total cost) Net Profit Faculty & Department share (25%) Student Share (75%) Per month student profit 5.45 L 54,500.0 26.95-54,500= 26, 40,500.0 6, 60,125.0 19, 80,375.0 8200.0' (Approx.)

#### 14. Marketing strategy/Plan including product sale

#### Marketing:

- Supply to specialized markets
- Supply to wholesale markets, local markets and farm gates etc.
- Sales point at college /university premises in an outlet

#### 15. Risk assessment:

- Unforeseen fluctuation in market demand
- Perishiability of produce
- Phyto-sanitory conditions
- Productivity variations
- Quality of seeds and produce etc.

## **MODULE-3**

#### (Processing of fruits and vegetables for value addition)

#### Module-3: Processing of fruits and vegetables for value addition

#### 1. Location with address: College of Horticulture/Department.

#### 2. **Objectives:**

- To provide interactive learning experience in value addition of horticultural produce at commercial level
- To impart professional skills in operating and maintenance of equipments in processing plant
- To impart skills in quality control assurance of processed products
- To develop professional skills amongst the students in dealing with customers/marketing
- To develop professional skills in finance and market management
- To help in developing managerial skills amongst the students

#### 3. Justification of skill learning and employability:

India is the second largest producer of fruits and vegetables in the world. At the same time, there are huge post harvest losses in the fruit & vegetable industry, that are estimated to range between 25-30%. Several causes contributing to these losses mainly include lack of infrastructure and poor knowledge of value addition. Presently, less than 2% of the total horticulture produce is processed in spite of increased demand in the market for different processed products. The products proposed in this programme have a wide consumer demand and are being sold commercially at high prices. Therefore, this unit can help in reducing postharvest losses, improve utilization of fruits & vegetables in glut season and provide quality items at reasonable cost. The students will gain firsthand knowledge in the manufacturing process, will acquire skill and have the opportunity for employment in selfemployment ventures, food industries, academic institutions etc. The skills to be learnt will include:

- Planning and execution of a market survey, preparation of processing schedule
- Preparation of project module based on market information
- Calculation of capital costs, sources of finance, assessment of working capital requirements and other financial aspects
- Identification of sources for procurement of raw material.
- Production and quality analysis of fruits and vegetables products at commercial scale
- Packaging, labelling, pricing and marketing of product

#### 4. A. Activity components :

- Market survey
- Sourcing for raw materials
- Details of products to be prepared
- Product specifications and licensing
- Establishment of processing plant

- Production plan
- Production on the factory floor
- Packaging
- Quality assurance
- Cost and benefit analysis
- Marketing
- Risk assessment
- Profit

#### **B.** Activity components :

| S.No | Activity       | Components        | Sub components                                       |
|------|----------------|-------------------|--|
| 1.   | Orientation    | All aspects of    | Development of project proposal                      |
|      |                | EL                | > Quality parameters of the products                 |
|      |                |                   | Link organizations like banks etc                    |
|      |                |                   | Packaging, labelling and marketing                   |
|      |                |                   | Calculation of cost-benefit ratio                    |
|      |                |                   | Accounting and record keeping                        |

#### 5. **Project development:**

- p) Survey
  - Survey will be carried out for the availability of raw material as well as demand of the products in the market.
- q) Types of products '
  - Products will be selected based on consumer demand.
- r) Product specifications
  - Products would be prepared according to specifications given by FSSAI.
- s) Establishment of processing plant and licensing
  - Processing plant will be established as per the guidelines of FSSAI
  - License will be procured from FSSAI for the establishment of processing plant
  - Quality control laboratory will be established
  - Provision for waste disposal will be made
- t) Orientation about funding agencies NABARD, NHB, MoFPI, etc.
  - Feasibility of submitting proper project proposal in establishing the enterprise to these agencies would be explored. Facilities provided under different agencies will help the students to understand the source of funds.

#### u) Product development:

- It will include:
- Procurement of raw material, transportation and storage
- Conversion of raw material into semi and finished products
- Quality of the products will be ensured according to the FSSAI legal standards
- Calculation and costing of raw material, manpower, accessories, packing etc of the products

#### 6. Production plan: (Illustrative Example)

#### A. Raw material availability chart:

| 1   | 2               | 3          | 4        | 5= 4-3   | 6         | 7       | 8=6X7        | 9= 8X4    | 10          |
| Major   | r products      |            |          |          |           |         |              |           |             |
| 1   | Apple juice     | 28         | 55       | 27       | 20        | 500     | 10,000       | 5,50,000  | 2,70,000    |
| 2   | RTS             | 20         | 50       | 30       | 40        | 800     | 32,000       | 16,00,000 | 9,60,000    |
|   | beverages       |            |          |          |           |         |              |           |             |
| 3   | Fruit squashes  | 30         | 55       | 25       | 40        | 500     | 20,000       | 11,00,000 | 5,00,000    |
| Minor   | products        |            | ,        |          |           |         |              | <b>.</b>  |             |
| 4   | Fruit jam       | 70         | 90       | 20       | 25        | 250     | 6,250        | 5,62,500  | 1,25,000    |
| 5   | Pickles         | 40         | 50       | 10       | 20        | 250     | 5,000        | 2,50,000  | 50,000      |
| Total   | ·               |            |          |          | 145       |         |              | 40,62,500 | 19,05,000   |
| Share of 15 students' @ 75% of Rs.19,05,000 = Rs. 14,28,750 |                 |            |          |          |           |         |              |           |             |
| Share of each student for six months $=$ Rs. 95,250         |                 |            |          |          |           |         |              |           |             |
| Share   | of each student | per month  | 1        | = R      | s. 15,875 |         |              |           |             |

Note: Selection of products would depend upon market demand and regional needs

Fruit/vegetable recovery (Approx) = 50-60% Cost of raw material (Approx) = Rs.10
 Production cost includes processing, packaging and transportation charges = Rs.10-15/- per kg

> Quality check for raw material = Physico-chemical characteristics like TSS, acidity, pH, sugar, salt etc. wherever applicable.

#### 7. **Production activities:** Same as above

#### 8. Marketing strategy/Plan including product sale:

#### Marketing:

- Sales point at college /university premises in an outlet
- Local state co-operative societies
- Hostels /Health and fitness centers/schools/NGOs
- Weekend markets in street markets
- Shopping malls

#### 9. Risk assessment:

| Risk identified             | Action proposed  |
|-----------------------------|--|
| Hike in prices of raw       | Appropriate measure would be taken to stabilize the          |
| material                    | production cost  |
| Non availability of power,  | Re-scheduling of preparation time during day                 |
| water etc                   |  |
| Extreme climate change      | Redefine our production targets                              |
| like heavy rains            |  |
| Equipment breakdown         | Attending to immediate repair                                |
| Non availability of raw     | Find alternate sources or substitute with available material |
| material/packaging material |  |
| Storage losses with         | Plan for pest control, storage containers, cold room etc     |
| perishables                 |  |
| Non-availability of         | Hire a vehicle due to non-availability of official vehicle   |
| transport                   |  |

#### 10. Infrastructure required with cost for fruit & vegetable processing plant: (A). Processing Plant Building and ETP

| Sino | Item required  | Approximate Cost |
|------|--|------------------|
|      |  | ( <b>R</b> s )   |
| 1.   | Processing hall comprising of processing area, raw and<br>packaging material stores, finished product store,<br>office, Quality control lab, boiler room, waste water<br>drainage and treatment system, lighting system, 3<br>phase power connection, etc. | 40.00 lakhs      |

#### (B). Machinery and equipments

| Plant machinery and equipments  | Cost (Rs. In lakhs) |
|---|---------------------|
| Boiler with accessories, cold store, juice/ beverage/<br>bottling line, pulper, double jacketed kettle, juice | 90.00               |
| extractor, SS top tables, SS mixing and storage tanks   | N                   |

| with agitators, SS lines with/without on line filters and |             |
|---|-------------|
| two and three way valves, sorting belt conveyor,          |             |
| washing tub with re-circulation pump, hydraulic press,    | · · · · · · |
| fruit grater, PP cap sealer, lug cap sealer, shrink wrap  |             |
| machine, platform type balance, hydraulic pallet truck,   | · · · ·     |
| storage drums/carboys, water storage tanks (plastic)      |             |
| plastic crates, ETP machinery, mechanical dehydrator,     |             |
| electrical motors, control cables and cables trays, steel |             |
| structure, stairs, walkways etc, quality control          |             |
| laboratory instruments etc.                               | · · ·       |
| Total cost of establishment (A + B)                       | 130.00      |
|   |             |

#### **11. Recurring contingency required:**

Fruits & vegetables Spices & condiments Salt, sugar and other additives Packaging and labelling material Laboratory chemicalsqw Stationery and record books Machine servicing and AMC Honorarium for guest faculty Expenses for faculty training Transport Miscellaneous **Total budget required** 

> Total Revolving Fund required (recurring contingency)

#### = Rs. 130 lakhs

#### = Rs. 10.00 lakhs
